

## Your Monthly Statistics for the Phoenix Metro Area

**DATA FOR SEPTEMBER 2018** - Published October 18, 2018

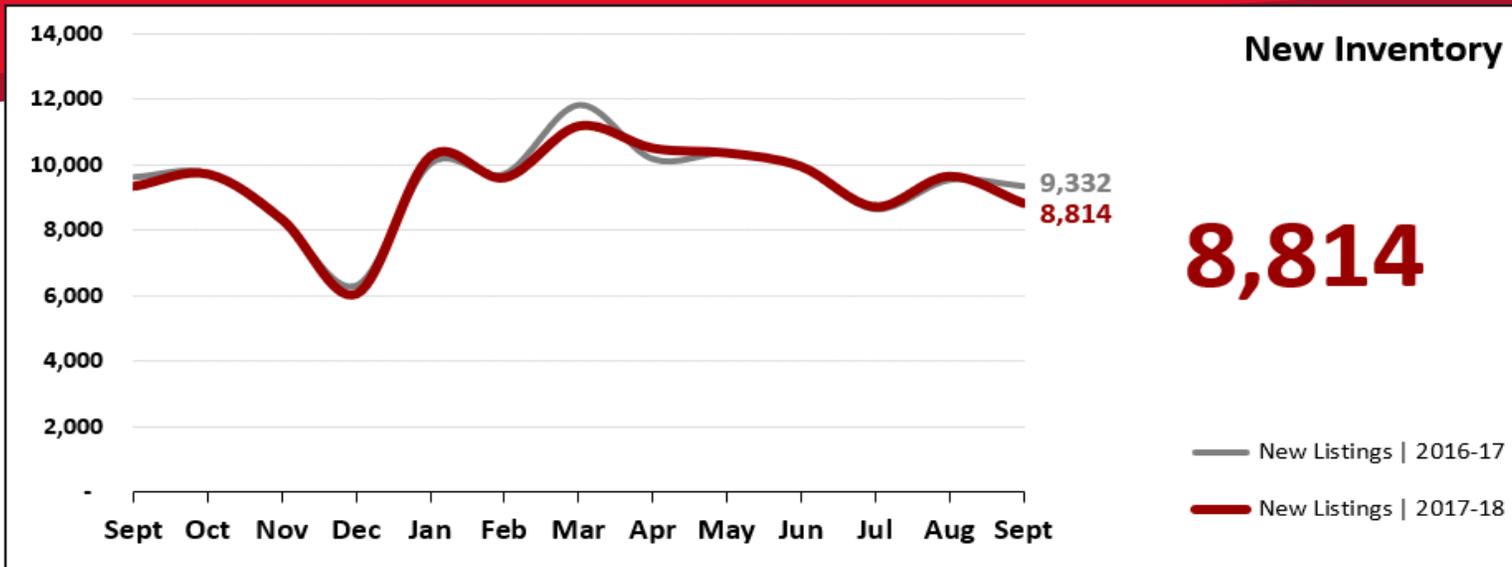

Sales are down -14.2% month-over-month. The year-over-year comparison is also down -5.9%.

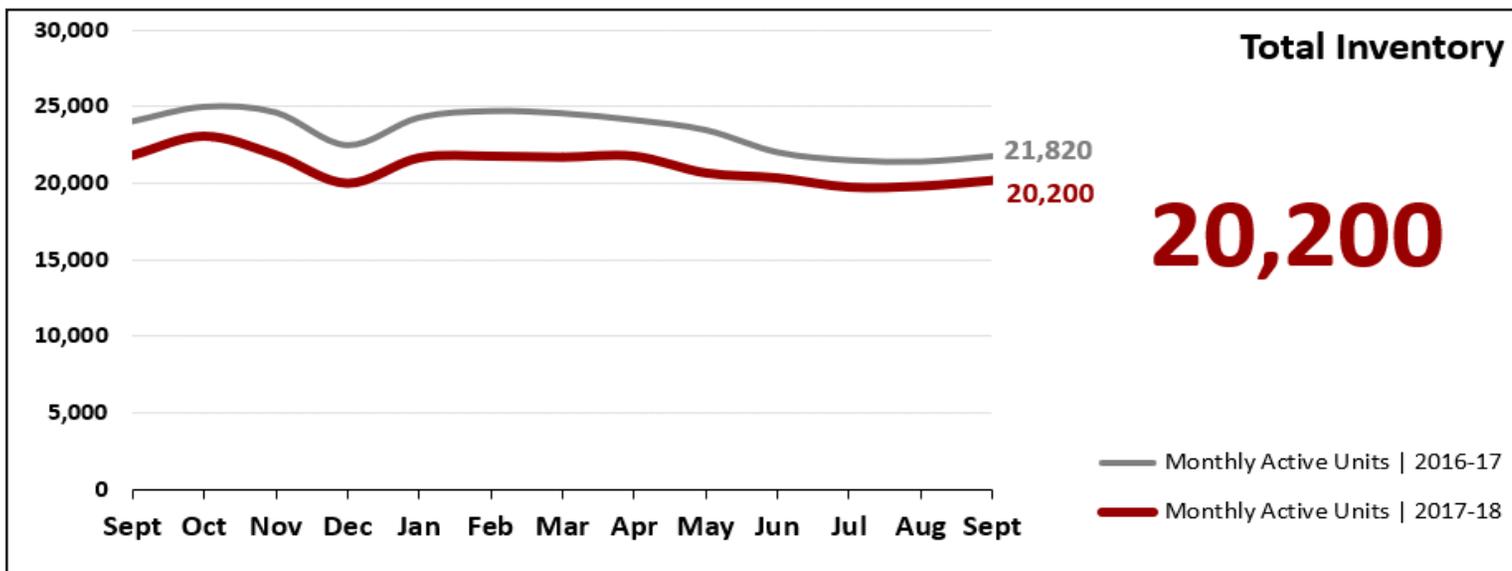

**6,897**

— Monthly Sold Units | 2016-17  
— Monthly Sold Units | 2017-18

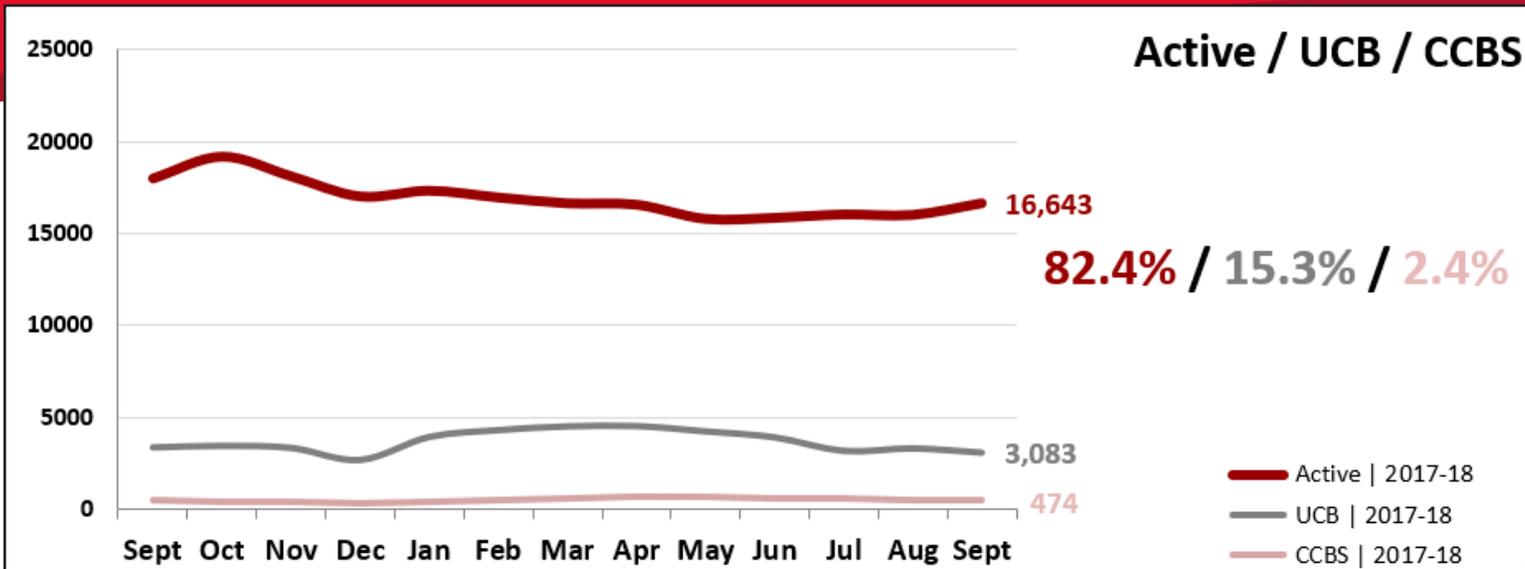

Closed MLS sales with a close of escrow date from 9/1/2018 to 9/30/2018, 0 day DOM sales removed

New MLS listings that were active for at least one day from 9/1/2018 to 9/30/2018, 0 day DOM sales removed

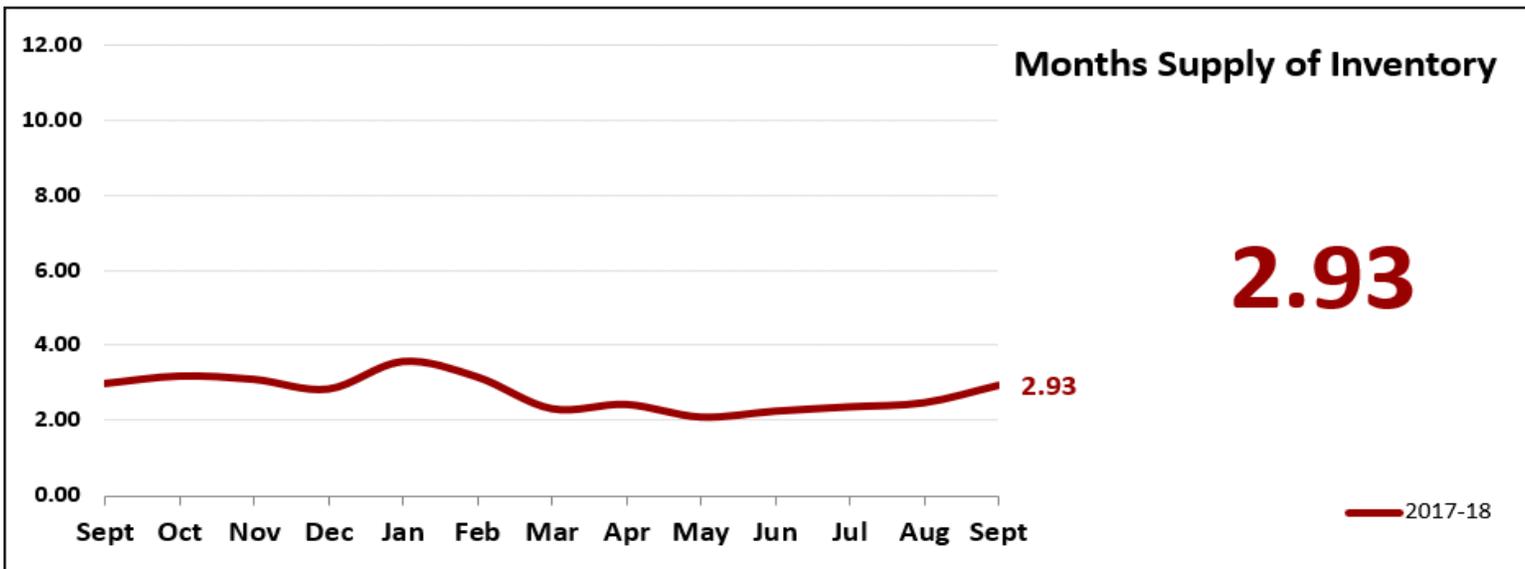

Snapshot of statuses on 9/30/2018

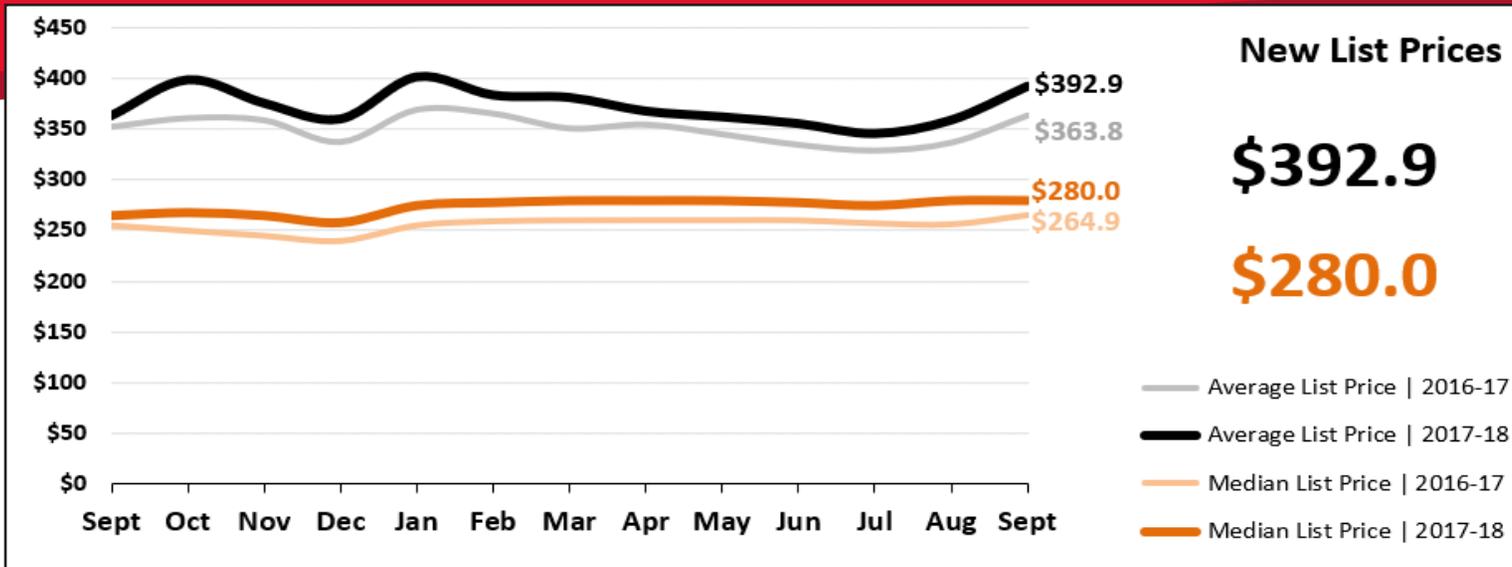

September UCB listings percent of total inventory was 15.3% with September CCBS listings at 2.3% of total inventory.

Snapshot of statuses on 9/30/2018

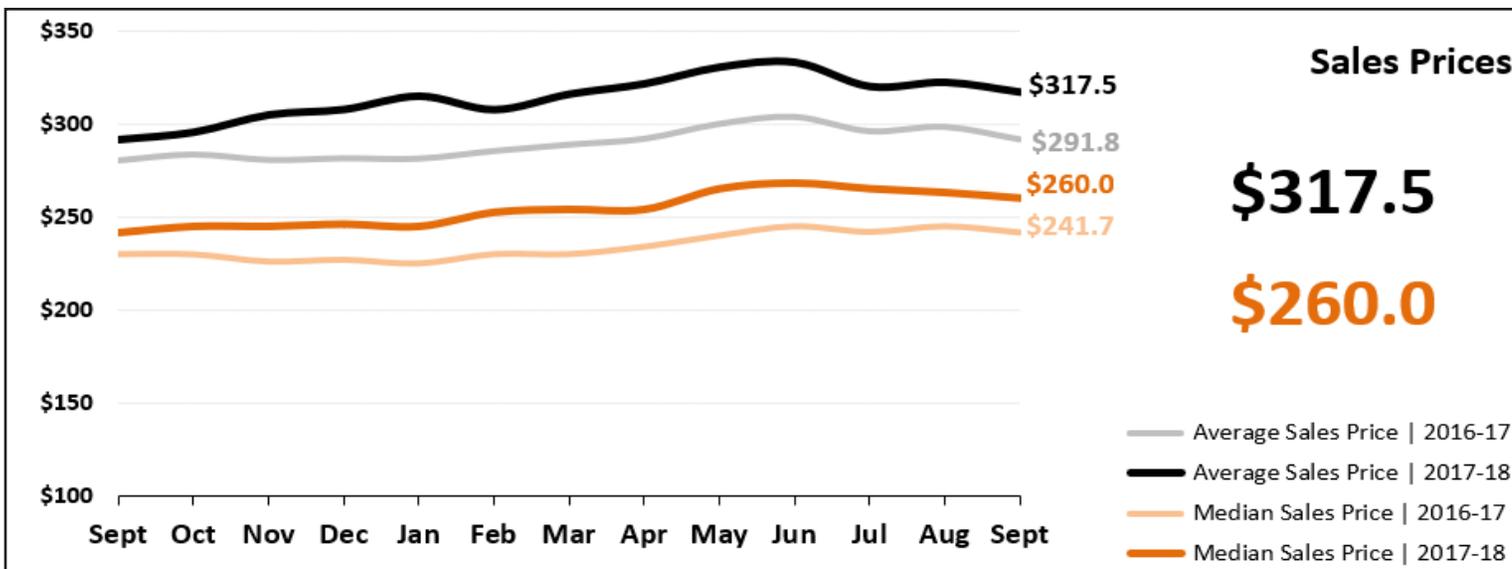

Months supply of inventory for August was 2.47 with September at 2.93.

Current inventory of Active/UCB/CCBS divided by the monthly sales volume of SEPTEMBER 2018, 0 day DOM sales removed

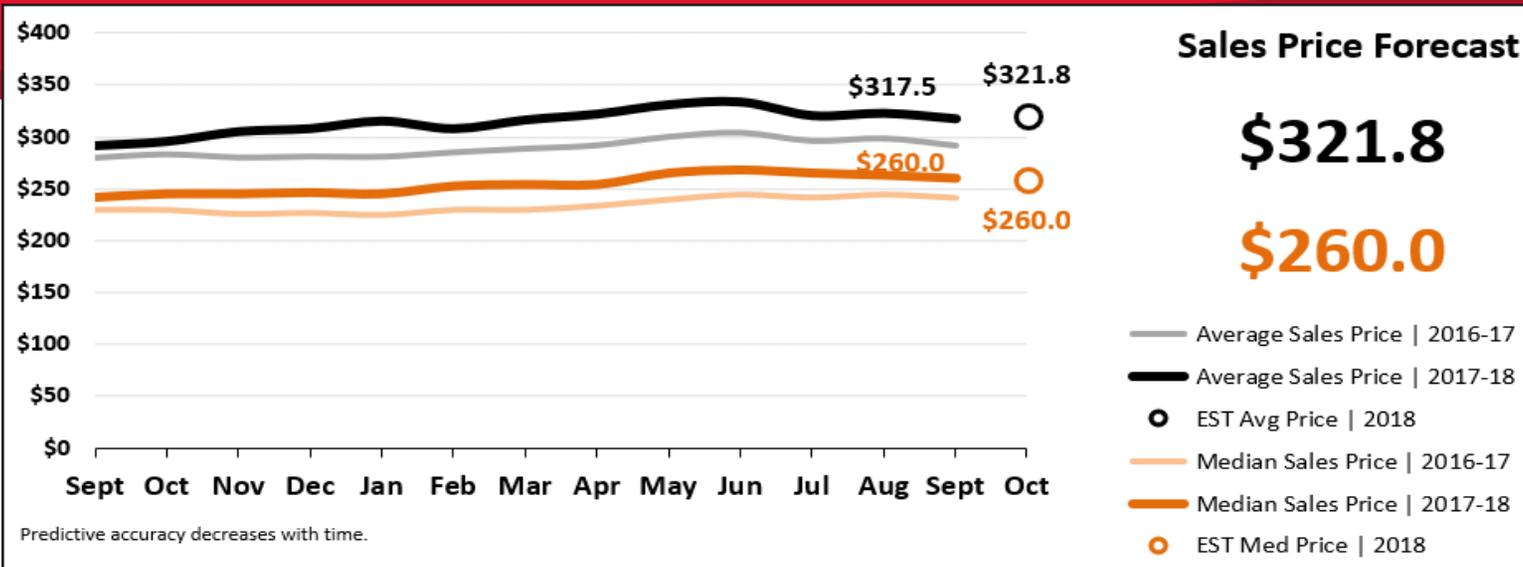

Average new list prices are up +8.0% year-over-year. The year-over-year median is up +5.7%.

List prices of new listings with list dates from 9/1/2018 to 9/30/2018, 0 day DOM sales removed

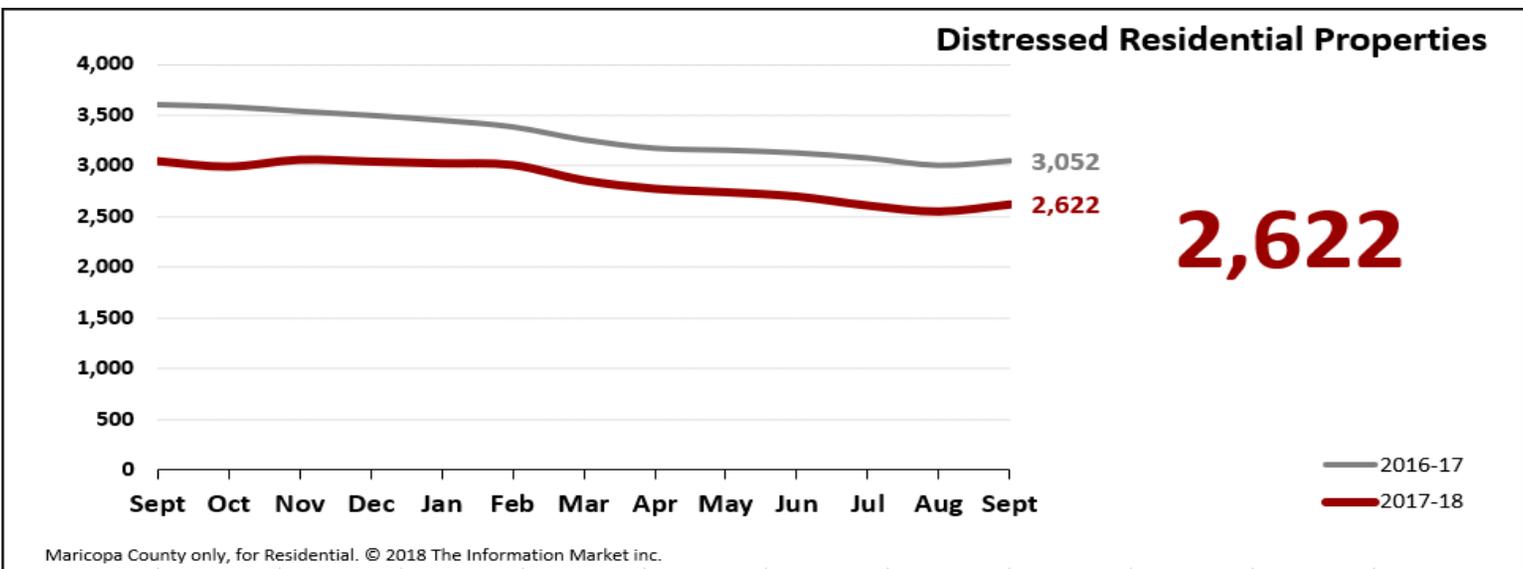

The average sales price is up +8.8% year-over-year while the year-over-year median sales price is also up +7.6%.

MLS sales prices for closed listings with a close of escrow date from 9/1/2018 to 9/30/2018, 0 day DOM sales removed

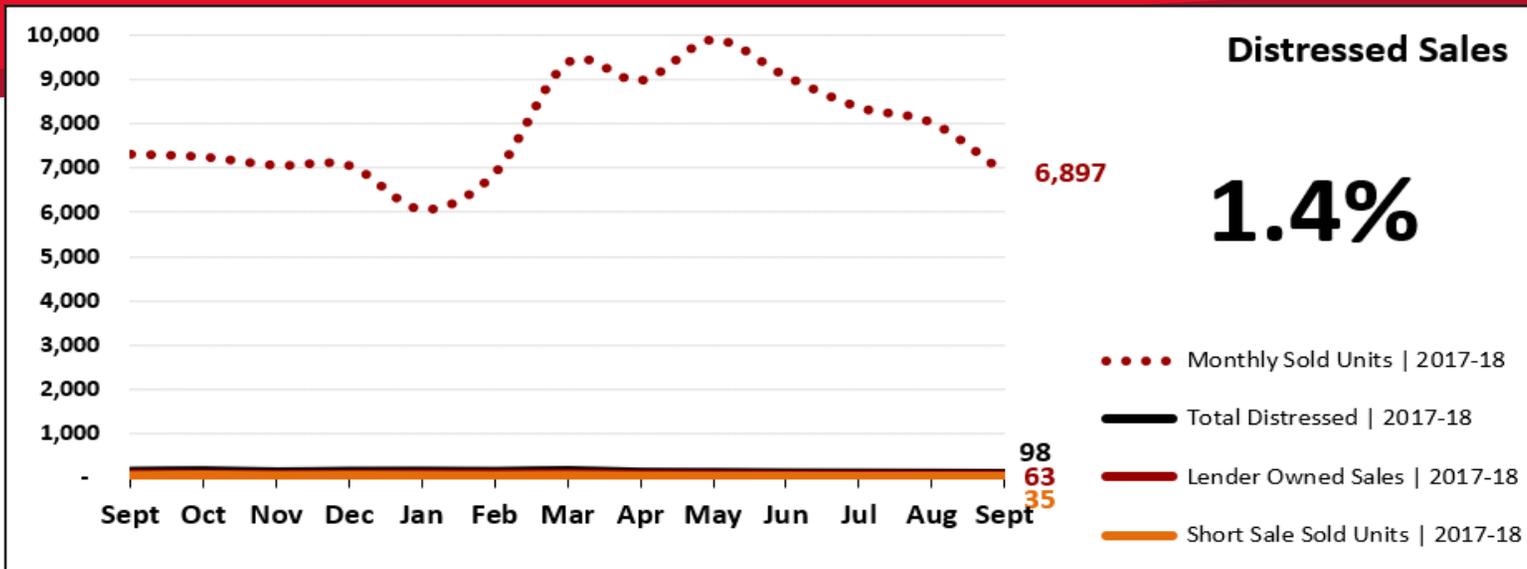

ARMLS proprietary predictive model forecast, 0 day DOM sales removed

An increase is forecasted in October for average sales price while no change is expected in the median sales price.

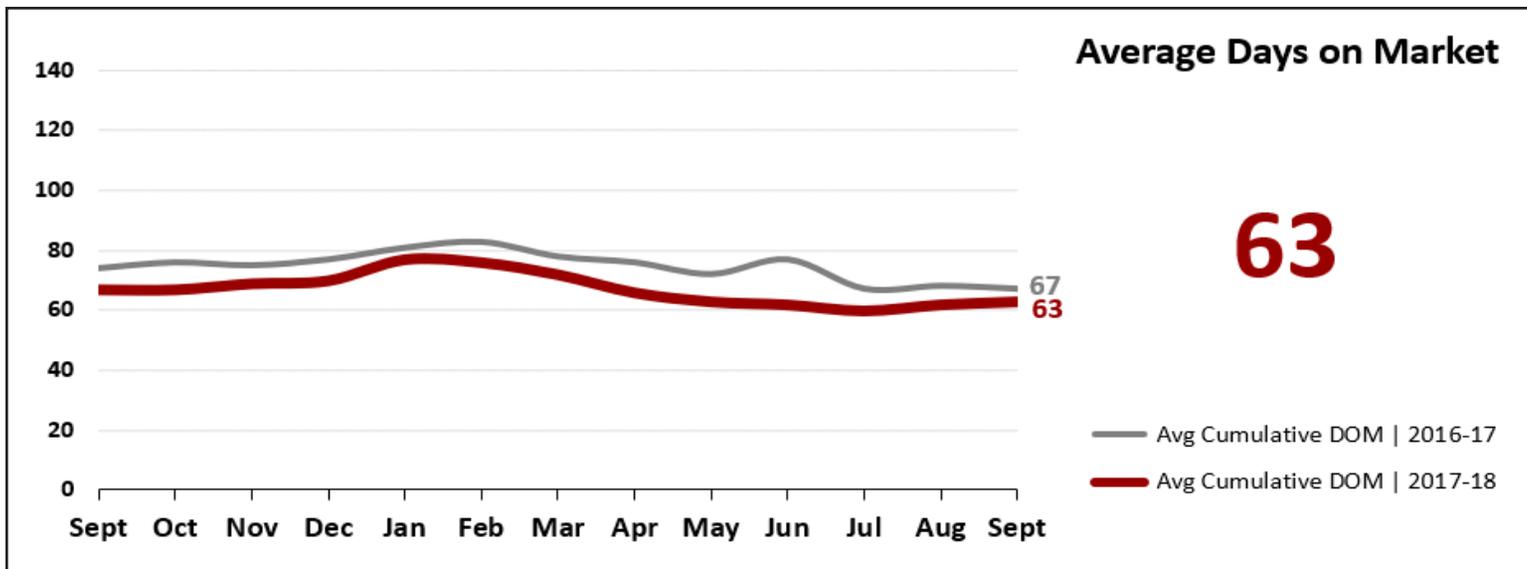

Foreclosures pending month-over-month showed an increase of +2.7% while the year-over-year figure was down -14.1%.

Snapshot of public records data on 9/30/2018 active residential notices and residential REO properties. Note: this graph was adjusted as total foreclosure counts were under reported for the last 8 months.

Distressed sales accounted for 1.4% of total sales, up from the previous month of 1.3%. Short sales dropped -35.2% year-over-year. Lender owned sales dropped -36.4% year-over-year.

New MLS listings that were active for at least one day from 9/1/2018 to 9/30/2018, 0 day DOM sales removed

Days on market were down -4 days year-over-year while month-over-month increased by +1 days.

MLS sales prices for closed listings with a close of escrow date from 9/1/2018 to 9/30/2018, 0 day DOM sales removed

This month in STAT let's look back at two prior STAT editions, January 2018 and May 2018. In January we discussed two divergent theories as to how 2018 might unfold. First, low inventory numbers will lead to higher prices and the higher prices, coupled with rising interest rates, will restrict demand and 2018 will see fewer sales than 2017. Second, millennials, the driving force behind our market, are one year older and their appetites and ability to purchase will increase. That, coupled with an improving economy, will lead to increased sales in 2018.

I leaned toward the second theory but concurred the first proposition would eventually play out. The question was not if, but when. Fast forward nine months to the third quarter of 2018. In their third quarter earnings report last week Stuart Miller, Executive Chairman of Lennar, said, "While national economic data has pointed to higher prices and rising interest rates causing slower overall sales, the basic underlying fundamentals of the housing industry of low unemployment, higher wages and low inventory levels remain favorable and are likely to support longer-term strength in the housing market." This leaves our market in the unique position of facing headwinds while benefiting from tailwinds. Go figure.

When we view the September sales volume, we see a 5.9% decline with 7,328 reported closings in 2017 and 6,897 this year. On the surface this looks like a significant drop, but when we place the volume in the perspective of business days, 20 in 2017 and 19 in 2018, there were 366 sales per business day in 2017 to 368 in 2018. This year slightly outperformed last year. When we turn to public records data and view total sales volume for the year, we see a 3.54% increase with 86,857 home sales in 2017 compared to 89,933 sales in 2018. So, what does this mean for the final quarter of 2018? There are hints that the first proposition above may be playing out. Don't be surprised if the numbers for the final quarter are slightly below what they were one year ago.

Turning to our May edition of STAT, we discussed how Zillow entered into the iBuying arena. Quoting the STAT commentary from Captain Obvious, “The most intriguing aspect of the iBuyer’s model to me is not how many homes they buy, but rather the offers they make that are not accepted. My guess is the number of offers rejected by homeowners looking to sell is exponentially higher than the number accepted. If this is the case, will the iBuyers eventually try to “monetize” the prospective sellers that inquire but don’t accept their offer?” We’ve all heard the ads, “If I can’t sell your home, I’ll buy it.” Are the iBuyers taking us to “If we can’t buy your home, we’ll sell it?”

On September 25th, Home Partners of America announced that its subsidiary, cataLIST, and Realogy Holdings Corp will offer a Cash Sale program through NRT’s Coldwell Banker branded operations, available in select markets. Through the cataLIST Program, an owner of a qualifying property who lists with Coldwell Banker will have the option of receiving a Cash Offer from cataLIST to purchase their home, generally within one business day of providing the property information. Within five days after receiving the cataLIST Cash Offer, the homeowner has the choice of accepting the offer or marketing the home for sale through the traditional listing process.

Two days later, on September 27th, Keller Williams announced it has been building and testing a cash offer program for the last year. The program allows homeowners to flip a property for cash using a computer-generated offer based on information about the property. The Keller Williams program is still in its infancy and would proceed through its KW Labs development process before hitting the consumer market. Spokesperson Darryl Frost said the company has spent the year “learning what consumers really want.” Frost suggested agents would be involved in transactions. “Through our test market, we have confirmed that consumers want an agent to help walk them through all their available options.”

We currently have three iBuyers in our market. Last month they accounted for 3.8% of all homes purchased in Maricopa County. Open Door accounted for 52.4% of the ibuys, Offerpad 28.8% and Zillow 18.8%. Data from Maricopa County public records is presented below.

## iBuyer Sales in Maricopa County from Public Records

201809	95	173	62	330	0.011	0.020	0.007	0.038	8610

The two latest entries into the iBuyer arena are not immediately headed to Phoenix. Disruption in our industry has been an everyday topic for decades. I find it interesting that the most “talked about innovation” is an extension of the fix and flip model, and that rather than charging the consumer lower fees, the focus is on providing more convenience with higher fees.

## **Pending Price Index**

Last month in STAT, the mathematical model projected a median sales price for August of \$257,500 while our “gut feeling” model projected \$260,000. Our gut considered the first 8 months of 2018 where our mathematical model had been underestimating the actual median sales price. The September median sales price followed our yearly pattern, confirming our instincts at \$260,000. With one less business day this year compared to last, we expected 2018 sales volume to be lower than 2017, and it was. ARMLS saw 6,897 sales this year compared to 7,328 last year. We had 5% fewer business days this year with September 2018 sales volume about 5.9% lower than last year.

Looking ahead to October, the ARMLS Pending Price Index anticipates the median sales price will hold steady, with a projected median sales price of \$260,000. It’s quite common for the median sales price to peak in June and then “wobble” through the end of the year. With a \$268,000 median reported in June, don’t be surprised if the median drifts between \$260,000 and \$265,000 through the end of 2018 with December approximating or falling just below the high-water mark in June.

Sales volume for the first nine months of 2018 was 1.68% higher than 2017, with 73,690 sales in 2018 compared to 72,475 in 2017. We begin October with 5,034 pending contracts, 3,083 UCB listings and 474 CCBS giving us a total of 8,591 residential listings practically under contract. This compares to 9,683 of the same type of listings one year ago. There were 22 business days in October of 2017 compared to 23 this year. ARMLS reported 7,268 sales in October of 2017. I expect sales volume to be slightly higher this year, I’m guessing 7,400.
